

Stop Wasting Water!

Reasons Why

The faucet runner
 The faucet runner is when you leave the sink water on and don't turn it off. You probably don't know how much. If you leave it on you waste almost 3 gallons or more so check every time you use the sink you use

The shower waster

The shower waster is when you take long shower you waste lots of gallons per day so take shorter showe

The Pool tub
 The pool tub is when you fill water to the top so fill the tub half-way. Don't leave the shower running you waste a lot if you do. Also check for leaks.

The water trash
 The water trash is when you throw trash in the toilet. When you do that you clog the toilet then that would cause the toilet to leak. Then you'd waste many gallons of water.
